

Mr. Gijimani Motau is an experienced geologist and aspiring mining entrepreneur with a BSc Honours degree in Geology from the University of Johannesburg. He has developed a strong professional focus on the exploration and extraction of rare earth elements (REEs) and base metals across Africa.

He has built a distinguished career spanning both underground and open-cast coal operations, where he has gained extensive hands-on experience in geological management, resource evaluation, and operational oversight. His technical expertise is complemented by a solid understanding of mining operations and project execution.

Mr Motau has expertise in managing diamond core drilling, water drilling, and reverse circulation (RC) drilling. He has successfully executed multiple projects, demonstrating strong technical capability, efficient project management, and a commitment to excellence.
